This app will let you compare two text files. Following are the instructions for using this app.

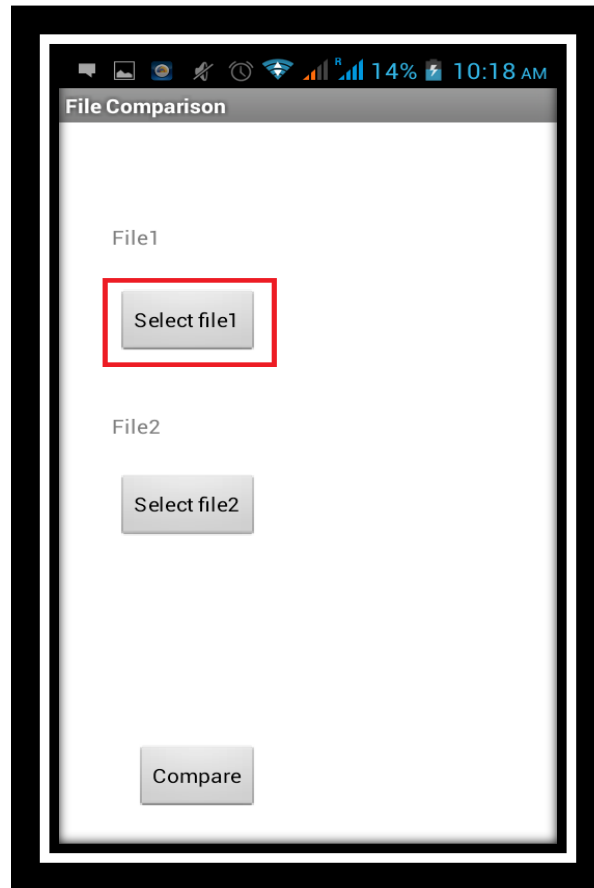

1. Install the File Comparison application.
2. Open the app.

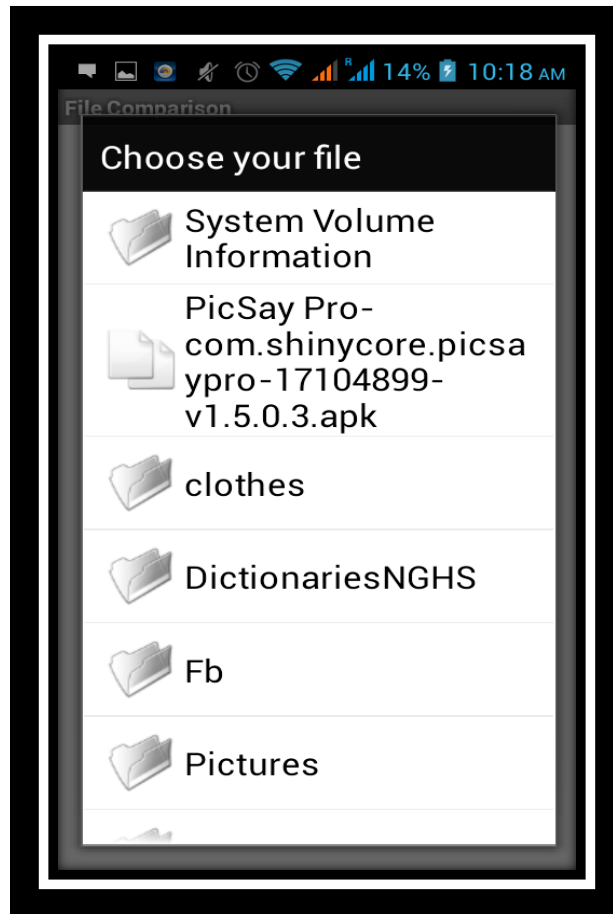

3. The first screen will get loaded.

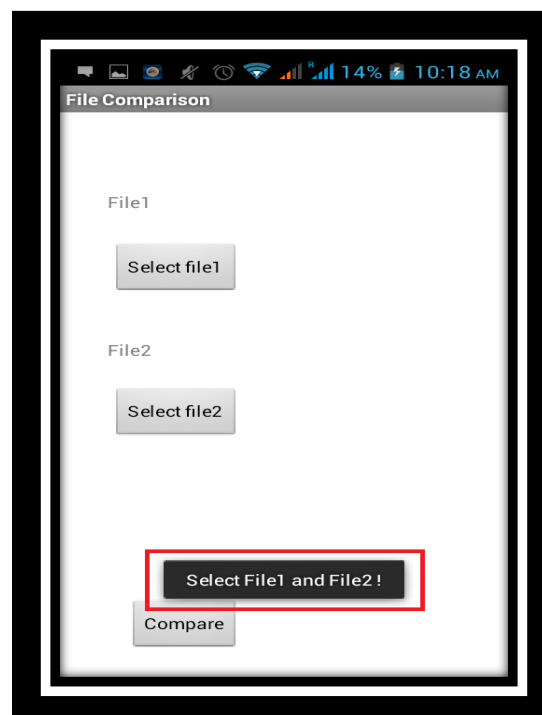

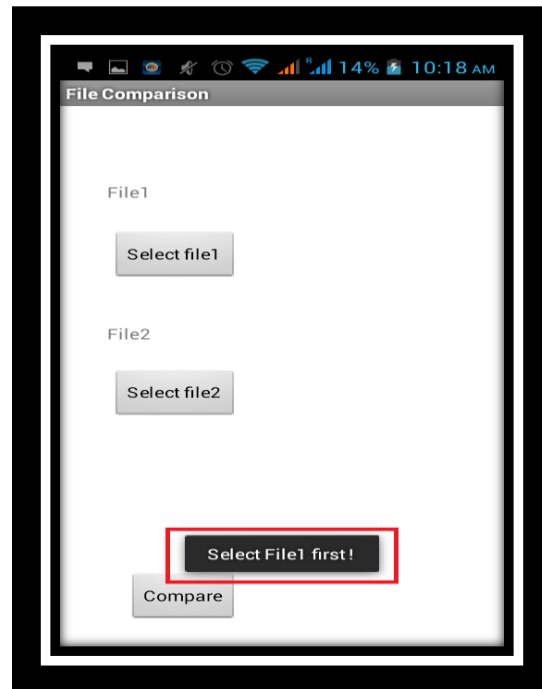

4. Click on the “Select file 1” button show in the screen shot below.

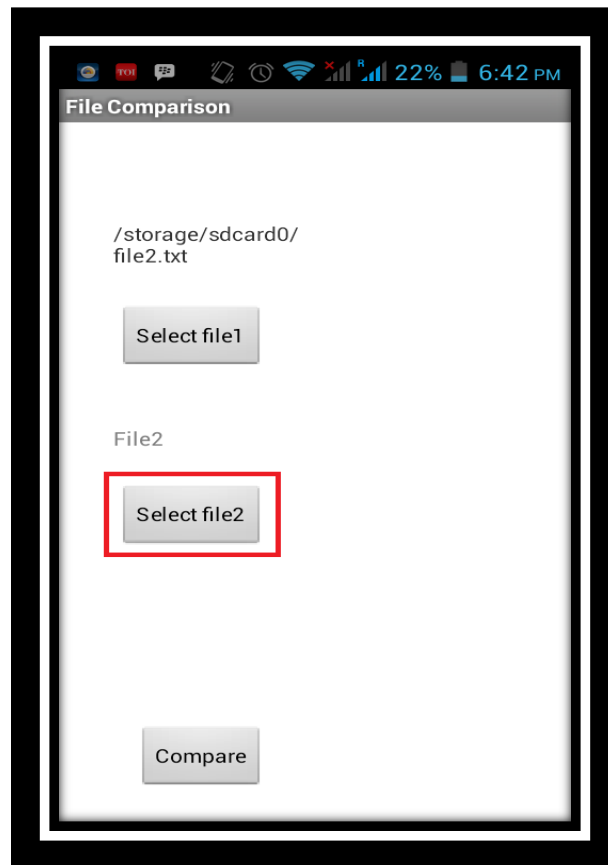

5. A file browser will pop up as shown below. Select the desired file from that browser.

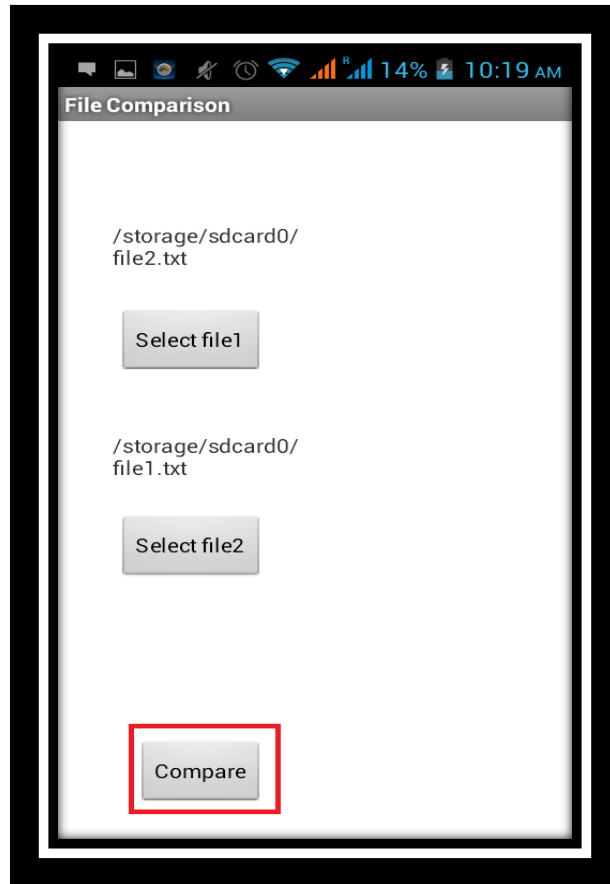

6. The application won't allow you to choose second file without selecting the first file. It even won't allow you to click on compare button without selecting both the files. It will give the following errors displayed in the screen shots.

7. Similarly click on “Select file 2” button to select the second file

8. When both the files gets selected, click on the “Compare” button.

9. Both the files will get loaded along with the comparison. Different words of both the files will get highlighted in red color font. The statistics of “Same and Different words” will be shown in between two files.
